## **KEY RISKS**

### **Liquidity**

The Company has to maintain cash balances and monitor cash inflows and outflows to ensure the availability of sufficient funds. The Company has also been implementing cost cutting measures which may include reduction of workforce and postponement of non-essential investments to help strengthen its cash position. It also continually evaluates assets or investments which can be sold.

### **High Customer Concentration**

The Company has been working towards improving its business and financial growth for the past years. Sixty-nine percent (69%) of the Company's revenues can be attributed to 2 of its major clients in 2022. As part of its growth strategy, the Company has been looking for new opportunities that would allow it to further diversify its business. In fact, for 2022, there is a 100% increase in the number of clients compared in 2021. At the same time, the Company still intends to continue to develop its current relationships with its long-term customers.

### **Stiff Competition and fast-paced evolution of the IT industry**

The Company operates in a highly competitive environment given the numerous existing and new technology companies that have the capacity to provide the same services with competitive pricing. Likewise, the speed at which technology evolves to cater the demand of individuals and businesses for technological advancements poses risks such as costly upgrades of systems and obsolescence of some services. Nevertheless, the Company mitigates these through establishing good relationships with its customers by providing quality services. The Company is continually identifying new, upgradable, and cost-effective solutions for its offered services. Accordingly, the Company invests in its employees' training to ensure that the Company is able to adapt with new technology.

### **Market Saturation**

The Company considers market saturation as one of the key risks in its business. The Company addresses this by developing new product and service offerings, and by focusing on innovation and product development. Xurpas management also continuously tries to find new markets that it can enter to offer its products and services.

On February 10, 2023, the Company announced that it will be expanding its business to Australia, a new market which is ten times larger than the Philippine market. Xurpas disclosed that it will offer a range of IT services in Australia ranging from staff augmentation and managed services, to bespoke software development among others.

### **Talent Acquisition and Retention**

Managing and retaining the right people is one of the key risks that the Company has identified. The Company has provided solutions to manage this risk by offering attractive compensation benefits and packages, implementing employee development and training programs, and providing employee recognition and rewards. Moreover, the Company adopts a flexible work arrangement which likewise attracts employees, and provides for a clear career progression and growth opportunities.

The Company has also been diversifying its talent pool, implementing a robust onboarding process and continuously try to build a strong company culture. The Company believes that the measures that it implements will mitigate the risk relating to talent retention.

## **Ability to maximize and adapt to new technologies**

The Company has disclosed that its acquisition and investment in various technology entities is aimed at creating platforms that offer a marketplace of technology products that consumers can choose from. The Company has equipped itself with various technologies to create the necessary platforms it can offer to the consumers. The Company's success will depend on its ability to maximize the potentials of these acquired technologies. Moreover, since the technology industry continues to develop at a robust pace, the Company will need to consider as part of its growth strategy that these technologies will need to be consistently updated, enhanced or developed to minimize risk on these becoming obsolete or impractical.

## **Concentrated ownership offers a potential risk for conflict of interest**

The Company is substantially owned and/or controlled by the three (3) founders, Messrs. Nico Jose S. Nollado, Fernando Jude F. Garcia and Raymond Gerard S. Racaza, wherein they own approximately 61.08% of the issued and outstanding shares of the Company. The Company has been working towards diversification. In fact, the Company has implemented the following to ensure that related party transactions, if any, are made at arm's length:

- Out of the eight (8) board seats, only three (3) board seats are occupied by the controlling shareholders (or their affiliates). Moreover, most of these directors are appointed as non-executive directors, which accordingly lessens the risk for conflict of interest.
- The Company's Chief Executive Officer (CEO) is also an independent party, not affiliated with the said principal shareholders.
- The Company has also appointed three (3) independent directors.
- The Company has strengthened its Related Party Transactions Policy. The Company also has an Audit and Related Party Transactions Committee that evaluates related party transactions, as may be applicable.

## **TRANSACTIONS WITH RELATED PARTIES**

In 2020, the Board of the Company also approved the sale of CTX Technologies Inc. to a director of Xurpas, Mr. Fernando Jude F. Garcia.

In 2022, the Company's founder, Mr. Nico Jose S. Nollado subscribed to new Xurpas Shares at a subscription price of Fifty-Five Centavos (₱0.55) per share, or an aggregate subscription price of ₱100 million.

## **INTELLECTUAL PROPERTY**

Since the Company's pivot as an information technology company specializing in enterprise solutions, the Company's intellectual property portfolio has evolved to reflect its new focus. The Company owns and holds exclusive rights to the proprietary software, applications, and other technology assets that it has created or acquired, with the exception of those assets it creates on a work-for-hire basis for its clients. The Company also incorporates third-party software and open source software into some of its products under the terms of various licenses, carefully managing its use to ensure compliance with

licensing terms and conditions. With respect to its mobile consumer content business, the Company maintains its rights to its entire product portfolio, excluding mobile consumer content in the form of licensed content such as music, videos and other content of a similar nature, which it licenses through third party licensors.

## **Platforms**

Key intellectual property of the Company includes the Griffin SMS Gateway program, which is a proprietary platform developed by the Company through which the Company deploys mobile applications through any telecommunications network protocol. The Griffin SMS Gateway program is built on a modular architecture and is written in Java, an industry standard programming language that allows the program to be deployed using most common operating systems, with the following key features:

- The Griffin SMS Gateway allows the Company to connect to any of its client Telco's SMS center, which represents the heart of any Telco's wireless network handling all SMS operations, such as routing, forwarding and storing SMS messages, using popular protocols.
- The Griffin SMS Gateway contains a "Multi-Function Middleware" feature that allows the Company to interface with its client Telco's "Intelligent Network", which is the network that allows a Telco to offer value-added services to its mobile subscribers on top of its standard services (voice and call services) through UCIP or Diameter, MMSCs via MM7, or billing systems via proprietary SOAP-XML or other proprietary HTTP-based protocols.
- The Java API of the Griffin SMS Gateway allows the Company's application developers to write code that can easily be integrated or deployed across multiple carriers that may have different systems.

The Company, through Storm, owns a patented proprietary platform that includes a system, method, and data processing apparatus working together to provide a secure and efficient payment processing solution for electronic transactions. The Company maintains the platform's patent with the Intellectual Property Office of the Philippines ("IPOPIL").

## **Trademarks**

The Company has exclusive rights to its corporate name, which may be deemed as a protected established mark in relation to the same or similar services without need for prior registration. Nevertheless, the Company is in the process of renewing the registration over this trademark with IPOPIL.

Despite the Company's shift towards information technology enterprise solutions, it still holds several registered trademarks that were registered under its subsidiary, Xeleb Technologies Inc., which is in the process of dissolution.

## **REGULATION AND KEY LICENSES**

The Company's mobile consumer business which refers to the development and delivery of mobile consumer content to its client Telcos, is considered as a form of value-added services regulated by the NTC under the Public Telecommunications Policy Act and related implementing regulations issued by the NTC.

While a value-added services provider (unlike other entities regulated under the Public Telecommunications Policy Act) is not required to obtain a franchise to operate, the NTC requires that

The Company also maintains programs for its employees' professional, technical and personal development.

## **COMPLIANCE WITH ENVIRONMENTAL LAWS**

## PLANS AND PROSPECTS

Aligned with the country's steps to recover and grow economically in 2023, Xurpas continues to expand and build its business as it takes advantage of the widening of digital adoption or a shift to digitization not just in the country but the world post-pandemic.

Consistent with last year's plans, the Group is maintaining its focus and efforts on IT Staff Augmentation, growing its products and services under custom software development and business solutions and seizing opportunities brought by Web 3.0. In order to achieve these objectives, the Group aligned some strategies to better maximize its competitive advantage. These strategies involve i) geographical – extending presence beyond the country's borders ii) operational – streamlining its operations and reinforcing marketing efforts with digital marketing and iii) product expansion – focusing on the latest technological advances, including machine learning and artificial intelligence.

1. **IT Staff Augmentation:** The demand continues to increase for IT staff augmentation year-on-year and is proven by the continuing increase in revenues for 2022 since it was launched. The Company believes that the increased requirements of both private companies and public entities for digital transformation, especially in a post COVID environment, creates multiple opportunities for its enterprise business. This also led to the Group's decision to expand its digital influence geographically to cover other markets in need of their services even beyond the country's borders. In 2023, the Company has announced its plans to establish its presence in Australia, with the aim of introducing its product offerings to larger markets.
2. **Custom Software Development:** As technology becomes increasingly ingrained in a lot of businesses, the demand to adopt digital transformation has also been increasing for the custom software development business. It has been one of their top priorities as they focus to keep up with these technological changes in order to stay relevant and competitive in the market. The Group has observed an increase in demand for its custom software development in 2022 where revenues substantially increased by 131% from last year. With this, the Group will continue to take this opportunity to maximize its expertise in providing these types of services in the market.
3. **Digital Business Solutions:** As the Group aims to curate a regional marketplace of B2B software services and products, it is targeting to cater the large untapped SME Market. The Group will help these companies enable their digital transformation by providing tools and solutions to address their business needs in financial, production/manufacturing, people, marketing, sales, and customer management. These products will provide similar functionalities and benefits as global brands used by multinationals and large local companies, but will be offered at a significantly lower cost, to accommodate the budget of local SMEs. These SMEs comprise a large percentage of the market. The Group shall implement this with a curated technology platform and an ecosystem of partners. The incorporation of Xurpas Software, Inc. ### Recent sales of unregistered or exempt securities including recent issuance of securities constituting an exempt transaction

#### 1. Overnight Top-up Placement – April 26, 2016

On April 26, 2016, the Board of Directors of Xurpas approved the holding of a Placing and Subscription Transaction ("the Overnight Top-up Placement") wherein Messrs. Nico Jose S. Nollado, Raymond Gerard S. Racaza and Fernando Jude F. Garcia (the "Selling Shareholders") sold an aggregate of 155,400,000 common shares (the "Offer Shares") to investors (the "Placing tranche") and the Selling Shareholders subscribed to an aggregate of 77,700,000 common shares (the "Subscription Shares") or 4.32% of the new issued and outstanding capital shares of the Company ("Subscription tranche").

The first part of the Overnight Top-up Placement consists of the offer and sale of the Offer Shares by the Selling Shareholders to (i) Qualified institutional investors in the Philippines qualified as an exempt transaction in reliance on Section 10.1(c) and 10.1(l) of the Philippine Securities Regulation Code (the "SRC"); (ii) outside the United States in reliance on Regulation S under the U.S. Securities Act of 1933, as amended (the "Securities Act"); and (iii) within the United States to "qualified institutional buyers" as defined in, and in reliance on, Rule 144A under the Securities Act. SB Capital Investment Corporation and Decker & Co., LLC are the Joint Global Coordinators and led the selling syndicate in placing the Offer Shares with investors.

The second part of the Overnight Top-up Placement consists of the subscription by each Selling Shareholder to 1.4% of the Company's total issued and outstanding capital shares, in the form of new shares issued out of the authorized capital stock of the Company at a subscription price equivalent to the Offer Price. Xurpas claimed exemption from registration under Section 10.1(e) and (k) of the Securities and Regulation Code.

## **2. Acquisition of Art of Click Pte. Ltd ("AOC") – October 6, 2016**

On October 6, 2016, Xurpas signed a Share Purchase Agreement with Emmanuel Michel Jean Allix and Wavemaker Labs Pte. Ltd. (the "Sellers") for the acquisition of 100% shares in AOC for an aggregate consideration of PhP1.40 billion in cash and in Xurpas shares. AOC is a Singaporean start-up firm established in 2011 that specializes in mobile marketing solutions for advertisers, publishers, app developers and other operators. Its key markets include Japan, Korea, Hong Kong, Taiwan, Southeast Asia, North America and Europe.

The cash consideration consists of (1) an Upfront Payment to the Sellers amounting to US\$2,797,106 (135,379,930) and (2) cancellation of employee stockholder options through Xurpas' subscription to one ordinary share in the capital of AOC for US\$2,202,894 (106,620,070). This was used to pay the AOC's Employee Stock Ownership Plan ("ESOP") shareholders.

The Xurpas shares to be issued to the Sellers consist of (1) an Upfront Payment amounting to US\$19,451,739 payable in Xurpas shares to the Sellers on the acquisition date, (2) Installment Payment payable to the Sellers in Xurpas shares one year after the closing date and every year thereafter until three years after the closing date, and (3) a Deferred Purchase Consideration which shall be subject to a net income after tax floor per year that AOC has to meet as a condition precedent to the entitlement of the Sellers to the Deferred Purchase Consideration and payable in three (3) tranches. The aggregate amount of Deferred Payment Consideration for a three-year deferred payment period shall in no case be greater than US\$13,962,725. In the finalization of the purchase price, the parties have clarified that the Deferred Purchase Consideration shall be fixed at US\$13,962,725 and shall not be subject to the performance metrics of AOC, and such is intentionally part of the original consideration. Accordingly, the Deferred Purchase Consideration was considered as part of the acquisition cost in the final purchase price.

The number of Xurpas shares to be issued at each tranche shall be determined using the average market value of Xurpas common shares fifteen (15) days before and fifteen (15) days after the closing date or each commitment date, as applicable, agreed to by the parties.

Included in the Share Purchase Agreement is a call option granting the Sellers an option exercisable within fifty-one (51) months following the Closing Date and only upon the occurrence of a Call Option event to purchase from Xurpas their respective proportionate share in the Sale Shares. This was subsequently waived.

On June 2017, amendments were made to the share purchase agreement with one of the sellers, Emmanuel Michel Jean Allix (“Allix”), which (a) resulted in the payment of US\$7.24 million or ₱358.50 million, (b) changed the manner of payment of the Installment Payment payable and Deferred Purchase Consideration from being partly in cash and Xurpas shares to solely in cash, and (c) changed the term of the Installment Payment payable from being payable in three years after the closing date to being payable within the year.

On July 18, 2017, Xurpas reacquired 53,298,242 common shares Upfront Payment issued at acquisition date to Allix, a former shareholder of AOC, for a consideration of US\$532,983 or ₱26.65 million.

On October 3, 2017, Xurpas entered into an agreement to amend the share purchase agreement with Wavemaker Labs Pte. Ltd. (“Wavemaker”), a former shareholder of AOC, which provides for (a) the adjusted purchase price, (b) the change in manner of payment for the Installment Payment and Deferred Consideration pertaining to Wavemaker from being payable in Xurpas shares to cash, and (c) changed the term of the Installment Payment payable from being payable in three years after the closing date to being payable within the year. To implement these amendments, there will be a placement and subscription transaction involving 67,285,706 Xurpas listed shares of existing shareholders by way of a block sale through the facilities of the PSE in 2018. Three shareholders of Xurpas sold their shares to Wavemaker, as an advance on behalf of Xurpas. The said shareholders, then subscribed to an aggregate of 67,285,706 Xurpas shares to replace the shares already advanced. Xurpas is claiming exemption from registration under Section 10.1(k) of the Securities and Regulation Code.

The 16,641,244 common shares initially issued to Wavemaker representing the Upfront Payment shall be placed by Wavemaker in an escrow agent who is authorized to sell these shares after these are listed. The allocation of the proceeds from the sale of these shares will be determined in the future subject to certain conditions.

On October 3, 2017, Allix and Wavemaker executed a waiver of the second and third tranches of the Deferred Purchase Consideration. The Sellers also waived their call option on the shares.

## **ITEM 6. Management's Discussion and Analysis or Plan of Operation**

2022 is the year where the nation gradually shifted its focus from COVID-response to economic recovery. Businesses, schools and tourism were finally reopened at their almost full capacities in an attempt to regain their pre-pandemic standing. This has been evident by the increase of the country's Gross Domestic Product (GDP) to 7.6% in 2022 compared with the 5.6% growth in 2021, per Philippine Statistics Authority.

However, there were other external factors that inhibited the full progress towards economic recovery of the country especially during the last quarter of the year. High inflation, rising interest rates and weakening of the Philippine Peso versus various foreign currencies were evident by the end of 2022 which affected economic performance. It is also this year when cryptocurrencies entered a difficult period of declining prices – the crypto winter. The drop in the value was steep by almost 70% for Bitcoin and Ethereum by the end of the year. The abovementioned variables made an impact in the Group's financial situation having assets and liabilities that require mark to market valuation. As the Group has 1) investment in subsidiaries and associates which have foreign functional currencies 2) liabilities denominated in US Dollar and 3) cryptocurrencies, the Company has to ensure that these assets and liabilities are measured at their fair value based on current market conditions at year-end. All these resulted to the recognition of unrealized forex losses, revaluation losses, and impairment of goodwill for an affiliate. However, it is noteworthy to mention that excluding these uncontrollable and one-off expenses by the Group, an improvement can still be seen in the Company's operational performance in 2022, compared with the previous year.

Notwithstanding this, the Group continues to strive and put vigorous efforts to further strengthen and build its businesses. The Group continues to see a lot of opportunities and continues to provide services to the market to jumpstart their digital transformation given its high and growing demand even at post-pandemic. Plans to continue strengthening its enterprise service business by focusing on IT staff augmentation, further growing its services under custom software development and business solutions and seizing opportunities brought by Web 3.0 are consistently aligned with the strategies being undertaken by the Group which involves geographical, operational and product expansion.

The Group's total revenue in 2022 was ₱227.32 million, an 8% increase from results in 2021. Despite the improvement in revenues, due to external factors discussed, net loss was at ₱75.90 million in 2022 (a 190% deterioration in comparison to the ₱26.16 million net loss in 2021). Majority of the increase in revenue was driven by enterprise services which generated ₱167.81 million or 74% of the total revenue. This was followed by other services and mobile consumer services which generated ₱43.83 million (19% of total revenues) and ₱15.68 million (7% of total revenues), respectively in 2022.

The blended cost of services in 2022 went up from ₱158.88 million to ₱169.79 million as compared to 2021 which is consistent with the increase in revenues primarily under IT staff augmentation. The increase is also contributed by the substantial increase of outside services of AllCare in correlation to its increase in revenue for 2022.

Gross margin on total revenues went up significantly by 55% from a gross profit of ₱37.22 million during 2021 to a gross profit of ₱57.53 million in 2022 and is driven by the increase in revenues for the period. There was also an increase in the overall gross profit margin to 25% in 2022 from 18% in 2021.

General and administrative expenses (GAEX) increased by 77%, from ₱85.25 million in 2021 to ₱150.90 million in 2022. The increase is largely caused by non-recurring operating expenses incurred for the year such as provision for impairment losses, unrealized foreign exchange losses, and write-offs of receivables which are non-cash expenses amounting to ₱53.17 million. In addition, salaries and wages also contributed to the increase in 2022 GAEX due to additional management and manpower which is imperative to continuously achieve growth and to be able to implement expansion as part of the Company's plan.

Excluding the non-recurring expenses incurred, pre-tax operating loss is lower by 22% in 2022 compared with the previous year. Non-recurring expenses pertaining to unrealized forex and impairment losses and write-offs amount to ₱53.17 million in 2022 compared with the ₱5.48 million

figure in 2021. These non-recurring, non-cash expenses are largely brought by uncontrollable external factors.

The Company also shares in the recorded net losses of its associate companies, which amounted to ₱4.28 million for the year ended December 31, 2022 (a 1,238% increase from 2021).

Consolidated total assets decreased from ₱605.94 million as of December 31, 2021 to ₱602.66 million as of December 31, 2022. Despite the impairment of Storm assets and investment goodwill in MBL, the Group saw minimal change in total assets due to the compensating increase in working capital assets particularly from mobile consumer and enterprise services segments.

Consolidated total liabilities also went slightly higher by 3% from ₱613.85 million as of December 31, 2021 to ₱633.36 million as of December 31, 2022 largely due to the foreign exchange revaluation of foreign-denominated payables like advances from stockholders and constructive obligations of ODX. Lastly, consolidated capital deficiency went up to ₱30.70 million as of December 31, 2022, from a capital deficiency of ₱7.91 million in 2021 mainly due to the total comprehensive loss recognized by the Group in 2022 amounting to ₱122.79 million, a result of the mark to market valuation of the assets due to the deterioration of the Philippine peso vis-à-vis US Dollar and Singapore dollar; and the drop in prices of Bitcoin and Ethereum.

### *Pension Liability*

The accrued pension of the Group amounted to ₱21.31 million and ₱22.83 million as of December 31, 2022 and 2021, respectively. The decrease was caused by the resignation of a key management personnel in 2022 partially offset by the increase in manpower for the Company's IT staff augmentation operations.

### **Capital Deficiency**

#### *Total Capital Deficiency*

The Group recorded total capital deficiency of ₱30.70 million as of December 31, 2022, a 288% increase from December 31, 2021 with a figure of ₱7.91 million. This was mainly due to the total comprehensive loss incurred during the year which was materially affected by (1) impairment of investment in MBL; (2) impairment of Storm assets; and (3) the decreases in foreign exchange rates and cryptocurrency prices. This was partially negated by the capital infusion that occurred in the first quarter of 2022.

## **Outlook for 2023**

Aligned with the country's steps to recover and grow economically in 2023, Xurpas continues to expand and build its business as it takes advantage of the widening of digital adoption or a shift to digitization not just in the country but the world post-pandemic.

Consistent with last year's plans, the Group is maintaining its focus and efforts on IT Staff Augmentation, growing its products and services under custom software development and business solutions and seizing opportunities brought by Web 3.0. In order to achieve these objectives, the Group aligned some strategies to better maximize its competitive advantage. These strategies involve i) geographical –extending presence beyond the country's borders ii) operational– streamlining its operations and reinforcing marketing efforts with digital marketing and iii) product expansion– focusing on the latest technological advances, including machine learning and artificial intelligence.

1. **IT Staff Augmentation:** The demand continues to increase for IT staff augmentation year-on-year and is proven by the continuing increase in revenues for 2022 since it was launched. The Company believes that the increased requirements of both private companies and public entities for digital transformation, especially in a post COVID environment, creates multiple opportunities for its enterprise business. This also led to the Group's decision to expand its digital influence geographically to cover other markets in need of their services even beyond the country's borders. In 2023, the Company has announced its plans to establish its presence in Australia, with the aim of introducing its product offerings to larger markets.
2. **Custom Software Development:** As technology becomes increasingly ingrained in a lot of businesses, the demand to adopt digital transformation has also been increasing for the custom software development business. It has been one of their top priorities as they focus to keep up with these technological changes in order to stay relevant and competitive in the market. The Group has observed an increase in demand for its custom software development in 2022 where revenues substantially increased by 131% from last year. With this, Xurpas will continue to take this opportunity to maximize its expertise in providing these types of services in the market.
3. **Digital Business Solutions:** As the Company aims to curate a regional marketplace of B2B software services and products, it is targeting to cater the large untapped SME Market. Xurpas will help these companies enable their digital transformations by providing tools and solutions to address their business needs in financial, production/manufacturing, people, marketing, sales, and customer management. These products will provide similar functionalities and benefits as global brands used by multinationals and large local companies, but will be offered at a significantly lower-cost, to accommodate the budgets of local SMEs. These SMEs comprise a large percentage of the market. Xurpas shall implement this with a curated technology platform and an ecosystem of partners. Incorporation of Xurpas Software, Inc. is one of the actions being undertaken to fulfill this objective. This will focus on providing business solutions of various technological products and services to different industries from different scales.
4. **Web 3.0:** This is the third generation of web services and the next stage in the evolution of the internet. Web 3.0 will largely be built on three new layers of emerging technologies – edge computing infrastructure (superfast 5G data speeds), decentralized data infrastructure (data formats and software that are open, coupled with the advancements in blockchain technology) and Artificial Intelligence or AI driven services (expanding capabilities of AI and machine learning or ML). Xurpas shall leverage its existing global network going into Web 3.0 and shall tap the massive opportunity it offers for staff augmentation and custom development work.

As for the general and administrative expenses, Xurpas will continuously implement and monitor its cost reduction and containment program that would minimize or ensure efficient use of expenses such as rent, utilities, marketing and promotions, advertising, transportation and travel, advertising, and

seminars and trainings. The current WFH arrangement of Xurpas provides another opportunity for Xurpas to further cut costs relating to rent, utilities, and the like.

### **Full year 2021 compared with 2020**

The COVID-19 pandemic continued to be a challenge for the country as it widened its transmission in 2021. With the implementation of quarantine measures brought by the fluctuation of daily infections, it continuously affected the flow of mobility and business operations. The situation has been greatly addressed however, by the mass vaccination programs both done by the public and private sectors. This resulted in a generally more stable and predictable economic environment over the year. Companies adjusted to stabilize their operations despite the ongoing pandemic, and adapted new policies, such as work from home (WFH) arrangements, using digital marketing to promote their services, and undergo digitalization of their processes, wherever applicable.

The Group remains optimistic about its opportunities to provide services to companies who want to jumpstart their digital transformation given its high demand. A lot of businesses are transforming to improve business continuity amidst restricted mobility, due to the pandemic. Even as quarantine measures have eased, Xurpas is still convinced that enterprises will go digital or online because this has now become ingrained in consumer behavior.

Xurpas' major contributor to revenues, the IT staff augmentation segment, supports this digital transformation thrust of numerous companies. Its revenues increased from ₱16.14 million in 2020 to ₱90.67 million in 2021, or a 462% increase.

Moving forward, Xurpas will continue to expand and build its enterprise business segment (primarily the IT staff augmentation business) which will be the main component of its growth. The Company's plan is to address the multiple opportunities created by 1) global technology trends, such as Web 3.0, and 2) the acceleration of the digital transformation plans of large and small and medium scale enterprises during the pandemic. In support of this thrust, on January 20, 2022, Nico Jose S. Nollo, Founder and Chairman, infused equity amounting to ₱100.00 million. The proceeds will be for the expansion of Xurpas' enterprise business, specifically the IT staff augmentation business, employee benefits enhancement, equipment replacement, research and development, and general corporate purposes.

Likewise, net loss also went down by 62% from ₱68.82 million in 2020 to ₱26.16 million in 2021. The enterprise segment generated the majority of the revenue with 56% contribution or ₱117.57 million, followed by other revenues and mobile consumer services which generated 25% and 19% respectively. It should be noted that the revenue generated by the enterprise services was significantly higher in 2021 and is aligned with the Group's 2021 directive to focus on expanding this segment due to its demand and potential contribution to the Company's growth.

The aggregate cost of services of the Group increased from ₱127.19 million in 2020 to ₱158.88 million in 2021 or 25% increase. The rise is brought by the increase in salaries and wages and outsourced services parallel to the increase of its corresponding revenue.

GAEX in 2020 was higher primarily due to the provision for impairment loss totaling to ₱16.03 million. Other GAEX items such as salaries and wages, professional fees, rent, utilities, taxes and licenses, advertising, and seminars and training decreased as part of the continuing cost cutting measures implemented by the Company.

The Group recorded a 96% decline for the equity in net losses of associates, from ₱7.75 million in 2020 to an equity in net loss of ₱0.32 million in 2021. The finance costs and other income charges (net) incurred by the Group were ₱19.22 million and ₱45.25 million in 2021 and 2020, respectively. Lower finance cost was mainly due to lower interest expense paid for outstanding loans from local banks and non-banks. For the other income, there was also a decrease in this account due to the absence of penalties earned from late payment of customers, gain on sale of a subsidiary and foreign exchange gain which was present in 2020.

The Group's total assets in 2021 amounted to ₱605.94 million, a minimal decrease of 2% from 2020 recorded total assets of ₱617.06 million. The decline in assets was mostly due to lower current assets, namely, cash. Total liabilities, however, increased from ₱612.4 million in 2020 to ₱613.85 million as a result mainly of higher accounts and other payables. Lastly, the Group's total equity went down from ₱4.65 million in 2020 to a capital deficiency of ₱7.91 million in 2021 contributed by total comprehensive loss incurred by the end of the year.

## **Outlook for 2022**

As the battle with COVID 19 enters its third year, challenges were encountered at the start of the year due to the high level of cases brought by the Omicron variant which resulted in stricter quarantine restrictions from the end of 2021. Taking into account, however, the high percentage of vaccinated in the country and considering the mild cases brought by the variant, cases eventually dropped by mid-February 2022. This paved the way for the country to reopen its borders, ease restrictions and slowly step into the new normal path to economic recovery.

Aligned with the country's steps to recover and grow economically in 2022, Xurpas continues to expand and build its enterprise business segment which will primarily contribute to its growth. This is to address the multiple opportunities created by 1) global technology trends and 2) the acceleration of the digital transformation plans of large and small and medium scale enterprises during the pandemic. A lot of businesses are going digital or online to improve business continuity amidst restricted mobility, due to the pandemic. Even as quarantine measures have eased, Xurpas is still convinced that enterprises will go digital or online because this has now become ingrained in consumer behavior.

With this, Xurpas continues to strengthen its enterprise services business, focusing on the following: IT staff augmentation, growing its services under business solutions and seizing the opportunities brought by Web 3.0.

1. **IT Staff Augmentation:** Since the demand remains strong for IT staff augmentation, evidenced by the continuing increase in revenue for 2021, the Company will build and augment its current business by vigorously seeking new clients while at the same time maintaining and growing its business relationships with its existing long-term clients. The Company believes that the increased requirements of both private companies and public entities for digital transformation, especially in a post COVID environment, creates multiple opportunities for its enterprise business. The staff augmentation business of Xurpas increased by 194%, from ₱7.93 million in 1Q2021 to ₱23.30 million in 1Q2022.
2. **Digital Business Solutions:** Xurpas also plans to expand its digital business solutions service and product offering, catering to the large untapped SME market. Xurpas will help these companies enable their digital transformations by providing tools and solutions to address their business needs in financial, production/manufacturing, people, marketing, sales, and customer management. These products will provide similar functionalities and benefits as global brands used by multinationals and large local companies, but will be offered at a significantly lower-cost, to accommodate the budgets of local SME's. These SMEs comprise a large percentage of the market. Xurpas shall implement this with a curated technology platform and an ecosystem of partners.
3. **Web 3.0:** This the third generation of web services and the next stage in the evolution of the internet. Web 3.0 will largely be built on three new layers of emerging technologies – edge computing infrastructure (superfast 5G data speeds), decentralized data infrastructure (data formats and software that are open, coupled with the advancements in blockchain technology) and Artificial Intelligence or AI driven services (expanding capabilities of AI and machine learning or ML). Xurpas shall leverage its existing global network going into Web 3.0 and shall tap the massive opportunity it offers for staff augmentation and custom development work.

As for the general and administrative expenses, Xurpas will continuously implement and monitor its cost reduction and containment program that would minimize or ensure efficient use of expenses such as rent, utilities, marketing and promotions, advertising, transportation and travel, advertising, and seminars and trainings. The current WFH arrangement of Xurpas provides another opportunity for Xurpas to further cut costs relating to rent, utilities, and the like. These actions are expected to contribute to the Group's financial improvement in 2022.
